EDUCATION

Vellore Institute of Technology, Bhopal

Bachelor of Technology (B.Tech), CSE (Cloud Computing and Automation) — CGPA: 8.07

Bhopal, Madhya Pradesh

Expected May 2028

Saheed Major James Thomas Sr. Sec School

Senior Secondary Education

Bikaner, Rajasthan

May 2023

Holy Mission Public School

Secondary School Education

Bikaner, Rajasthan

July 2021

EXPERIENCE

Software Engineering Intern - eSim

FOSSEE, IIT Bombay

Remote

Aug 2026 – Present

- Contributing to the open-source development of eSim, an Electronic Design Automation (EDA) tool for circuit design, simulation, and analysis.
- Collaborating with the core team to implement new features, resolve software bugs, and enhance the integration of external simulation engines.
- Streamlining workflows and improving the platform's overall efficiency by adhering to best practices in open-source software engineering.

Freelance QA Tester

DADE (Drag & Drop Embroidery)

Remote

April 2026

- Conducted comprehensive manual QA testing for a US-based client's web application, executing a detailed 10-phase test plan.
- Identified, documented, and reported complex UI/UX bugs, including cross-tab synchronization issues, session routing, and authentication flows.
- Collaborated directly with the developer to ensure edge-case conflict resolution, optimizing the application for a seamless end-user experience.

PROJECTS

NewsGuard | *Python, Flask, scikit-learn, REST API* | [GitHub](#)

- Developed a responsive web application to verify news authenticity in real-time, utilizing a custom scikit-learn machine learning model with confidence scoring.
- Integrated an external news API for live data fetching and architected a Flask backend to serialize and serve the classification model via REST endpoints.
- Implemented an optimized frontend with vanilla JavaScript, featuring debounced search, dynamic loading states, and modal interfaces.

Speed-up (YouTube Extension) | *JavaScript, HTML, CSS, Browser APIs* | [GitHub](#)

- Developed a lightweight Google Chrome extension to override native video player limitations, providing users with highly granular playback speed controls.
- Engineered content and popup scripts in vanilla JavaScript to directly manipulate the DOM and maintain state across different YouTube video pages.
- Designed an efficient popup interface that communicates with browser storage APIs to manage user configurations without consuming excess browser resources.

TECHNICAL SKILLS

Languages: JavaScript, C/C++, Python, Java, HTML/CSS

Frameworks & Libraries: React.js, Node.js, Express.js, Django, Flask, Tailwind CSS, Pandas

Databases & Developer Tools: MongoDB, Git, GitHub, VS Code

Core Concepts: Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), Manual QA Testing
